

<b>Policy Manual</b>	Authority: Approved by Council	Type: Transportation
	Effective date: January 6, 2022	Revised date: January 6, 2022
	Policy No. 400-25 Line Excavation	

**R.M. of Browning No. 34**

**Policy No. 400-25 Line Excavation**

**January 6, 2022**

**Line Excavation**

1. Employees should exercise caution when excavating any ground regardless of the occurrence of buried lines marked or unmarked.
2. In the event that any excavation is required in an area that unmarked buried lines could be present, a line locating company must be called to ensure that the area is clear of lines within five (5) metres of excavation.
3. In the event that there are buried lines in the area to be excavated, the line must be excavated by a hydrovac truck or hand exposed.
4. In the event that an unmarked line is exposed or damaged, the site must be cleared and secured, and may only be re-entered when determined safe. Once the site is secured, the Foreman, Administration, and the proper authorities must be notified as soon as possible.
